Certificate ES10/8319

The management system of

JUNIOR DERQUI, S.L.
(JUNIOR GAS SPRING)

Complejo Ideal, Pol. Ind. Alcalá 10, C/ 2, Nave 2
41500 Alcalá de Guadaíra (Sevilla)

has been assessed and certified as meeting the requirements of

ISO 9001:2015

For the following activities

Gas springs manufacturing and distribution for automotive and furniture uses.

in/ from the following sites

Complejo Ideal, Pol. Ind. Alcalá 10, C/2, Nave 2 - 41500 Alcalá de Guadaíra (Sevilla)

This certificate is valid from
14 June 2019 until 14 June 2022.
Issue 6. Certified with SGS since June 2010.

Authorized by

Certification Management

SGS INTERNATIONAL CERTIFICATION SERVICES IBERICA, S.A.U.

THE COMPANY

JUNIOR GAS SPRING (JUNIOR DERQUI S.L.U.) was founded in 2002 and has been consolidated throughout these 20 years of experience in the national and international market to which it supplies gas springs to OE producers for bus, furniture and industrial sector.

Currently, Junior Gas Spring has the capacity to produce 300,000 springs per year tailored to its customers and with no minimum quantity per order, thanks to a patented system by which with only 85 references they can provide service for the equivalent of a stock of 1,421 passenger cars.

The company, has been following the ISO 9001:2015 quality management system since 2009 without any non conformity, and uses management systems such as the 5's, lean manufacturing and visual management. As a result of the innovations that the company has been introducing throughout these years of evolution, today it has an average service rate of 99.5% (order fill rate) in 24 hours, (Iberian Peninsula) in its orders, agility that it achieves thanks to the qualified manufacturing team and the sales team, made up of 26 people, of which 18 are sales agents distributed in Spain, Portugal, England and France.

The weekly review of the business parameters is a work guideline that the company has followed since its inception, as it has been applying in all its processes.

The key of our successful evolution consists in having unloaded stock that is customized at the last moment. For this we use control systems where we obtain the traceability of the product both in the manufacture and in the expedition".

Junior Gas Spring is one of the very few manufacturers in Europe dedicated mainly to automotive spare parts and has several patents for gas springs.

The company has been awarded by the CEA (Andalusian entrepreneur's organization) for its industrial excellence, also the Red Cross for its social commitment and the IIST (Instituto Internacional San Telmo Business school).

The company follows an environmental policy using a patented system of retractable sleeves instead of painting and recycling 100% of the waste.

1. A Gas Spring is filled with oil and highly pressurized gas. Therefore, do not try to open or drill into a Gas spring.
2. JUNIOR Gas Springs should be installed with the rod end downward.
3. First, check and compare design, length and mountings before installing the new gas spring.
4. Remember that it is the gas springs that holds the bonnet and rear hatch.
5. To avoid injuries of any kind, ensure a secure fastening of the bonnet or rear hatch when replacing springs.
6. Check mounting points in the body. If they are damaged they should be changed or repaired.
7. We recommend that the springs on the vehicle should be replaced in pairs.
8. On a car that has been extra equipped with blinds or spoilers for example. There is a risk that the rear hatch may be too heavy for gas spring designed with the original elevating power.
9. Gas Springs are design to bear axial loads only. Consequently any side load forces should be avoided. Specifically when Gas Springs are equipped with eyelet end fittings, special attention should be paid to design of connecting shafts in order to provide appropriated clearance (according to each application). As an indication only, we would advise: 0.3 to 0.5 mm clearance on shafts diameter and 0.5 to 1.0 mm clearance on each side of the eyelets.
10. The rod should be protected from particle blasting.
11. Please contact us when Gas Springs have to be working in corrosive environment or outside with the rod in extended position.
12. Make sure to avoid pollution of the rod surface by glue, putty, adhesives, corrosive products, paint, etc...
13. When the cylinder has to be repainted, be careful to protect the rod (solvents should not be used to clean the rod in order to avoid damaging the seal).
14. Protect the rod from blows, shocks, sparks from electric or grinding machines.
15. Never grip the rod with pliers or in a vice without using efficient protective lead, aluminum or copper jaws.
16. Be careful to heating effect of infrared devices (80°C maximum allowed temperature).
17. Operating temperature range : from -30°C to + 80°C Endurance behavior based on 60.000 working cycles test: 15% maximum performance loss. (test actual results will vary according to stroke length and nominal force value).
18. Nominal data are given for 20°C reference temperature. For each step of 3°C, forces variation might be 1%. Check “temperature Vs F1” in “downloads”
19. The self-contained gas (Nitrogen) is a neutral component of the atmosphere. Consequently, gas release is totally safe.
20. The Gas Spring other components, except the oil, are mainly steel so recycling of these components is similar to steel recycling.
21. To avoid pollution, used oil should be collected according to specific industrial waste regulations of each country.

INSTALLATION CALCULATION

SPECIAL NOTE:

Position the centre of the bracket or ball end you are using at this length.

- A = Moving pivot
 - D = Fix pivot
 - E = Hinge point
 - G = Weight of door (Newtons)
10 Newtons of force will lift approximately 1 Kg
 - H = Half the depth of door
 - F1=Force Required *
 - L= Minimum distance from the gas spring pivot centre (E)
 - N= Number of Gas Springs
- Formula:

$$F1 = \frac{G \times H}{L \times N}$$

SPECIAL NOTE:

The extended length of the gas spring should be approximately 60% of the length of the door or hatch you are lifting.

*Tolerance +/- 6 %

All Lengths are in centimeters.
